SGX-E20R

HANDPIECE FOR ZYGOMATIC & PTERYGOID IMPLANTS

Easy and efficient solution for Zygomatic and Pterygoid Implant

SGX-E20R can make your Zygomatic and Pterygoid implant treatment easier and more efficient. Benefit from the unique shape specifically designed for Zygomatic and Pterygoid implant treatment. NSK's special sealing system at the tip of the instrument prevents contamination from entering the instrument and the smooth surface makes decontamination easy.

The Optimal angle for Zygomatic and Pterygoid implants

Compared to a conventional surgical contra-angle, SGX-E20R is specifically angulated to optimise access to the Zygomatic and Pterygoid bone and greatly improves visibility.

Efficient cooling by external water supply

The external irrigation nozzle of the SGX-E20R cools the treatment field and bur efficiently.

Original sealing system

Preventing contaminants from entering the instrument makes decontamination easier and prolongs the life of the instrument.

20:1 Reduction

NON-OPTIC MODEL: **SGX-E20R** ORDER CODE : **HA1200**

- Stainless Steel Body ● Max. Speed : 2,000 min⁻¹ ● Max. Torque : 50 Ncm
- Twist Chuck ● Angle Handpiece ● External cooling
- For Osteotomy preparation / insertion of Zygomatic and Pterygoid implants for Maxillofacial & Oral Surgery

 Washable in the thermodisinfectors

 Autoclavable
